

ScreenWatch™ 4.4

The *Best Software* for Monitoring/Managing Computer Activity

ScreenWatch™ is an intuitive, software package which allows administrators or instructors to gain control of the client's PCs on the network. Remotely access any PC connected to the network using ScreenWatch™. Perfect for computer instructors, administrators, technicians and managers who need to monitor and manage computer activity.

Keep An Eye On Their Screens

Remotely view any screen one at a time or dozens simultaneously. Easily identify computer activity via status board.

Application/Web Block

Control and eliminate students from entering unapproved applications/URLs.

Application/Web Alert

Automatically alerts you when a person is trying to enter an unapproved application/ URL. You designate which sites are not permissible.

Capture Their Screens

Capture a client's screen and save it to a file for documentation. You can print and store for future reference.

Blank Student Screens

Gain your students undivided attention and keep them focused by blanking their screens.

Freeze Keyboard/Mouse

Prevent undesirable student input such as surfing the internet or checking email.

ScreenWatch Features:

SET WEB BLOCKS/WEB ALERTS

AUTOMATICALLY SCAN

VIEW MULTIPLE SCREENS

BLANK SCREENS

FREEZE KEYBOARDS/MICE

PRINT SCREENS FOR DOCUMENTATION

REMOTELY REBOOT/SHUTDOWN PCs

View student screens, PC information and more details...

Automatically Scan

ScreenWatch™ will cycle through the computers and display the each user's images.

View Dual Client Screens

Dual monitors are becoming very popular. With ScreenWatch you can easily see both screens simultaneously.

Find Student

Quickly locate a student on the LAN. Simply type in their name, press the "find-user" icon and ScreenWatch™ does the work for you.

Log-off Students

You select this icon when a student needs to work independently from the class.

Power Up/Down PCs

Conveniently, save time and energy by turning on or off student PCs right from your desk.

Reboot Student PCs

If you need to reboot a PC or a group of student PCs simply select this icon. Saves time and eliminates walking around the classroom to manually reboot the PCs.

Group Capabilities

Create and assign any number of students to a group or multiple groups. Identify the group by the course, professor, room number, etc.

EASY TO INSTALL AND USE

ScreenWatch™ is a turnkey software program that is installed on each administrator computer, as well as the client PC. Complete and easy-to-follow installation instructions are included.

Toll-free technical support is provided at no additional charge, for 90 days, Monday-Friday (8-5 E.S.T.)
